Product Description

Description The Pink Cream Wax has Titanium Dioxide, which creates a soft texture that glides easily onto the skin and leaves it soft, sleek, and hair-free. You can confidently use it on those who have extra-sensitive, dry, and/or tanned skin because the delicate formula poses less of a chance for irritation. To use this wax you will need:

- Wax Heater
- Spatulas
- Wax Strips (about 15cm each)
- Post-epilation lotion

Features:

- Pink cream wax for dry and dehydrated skin
- Formulated with titanium
- Soft, spreadable consistency

- Made in Italy
- Designed to be used with strips
- Melts and cools quickly for effective, comfortable waxing
- Low temperature application for comfort

Ingredients: Glyceryl Rosinatte, Paraffinum Liquidum, Colophonium, Cera Microcristalina, Titanium Dioxide Titanium pink odourless. Titanium Dioxide prevents the wax from adhering to the skin, reducing the discomfort of waxing. Pink TiO2 Titanium depilatory wax with extremely delicate rip, enriched with titanium which makes the product ideal for sensitive skin. Dermatologically tested.

Product Description

Advantages of Xanitalia Film Wax: Lower melting

temperature 104°F - 115°. Ideal for hair removal on delicate areas (armpits, bikini, face). Longer cooling time, which provides longer thermal exposure, relaxes hair follicles and makes waxing less painful. Completely adjustable to the skin surface, catching all the hairs without applications repeating. Because of it's extra elasticity Film Wax won't break during hair removal. When removed, Film Wax does not leave any broken hairs. Significantly reduces the time required for depilation procedure. **Directions for use** 1. Pour Pebble Wax into a wax warmer. Turn warmer on and heat wax for approximately 20 minutes. Do not melt wax completely; wax should be a thick consistency in the center and soft around the sides. 2. Before hair removal, check if the wax temperature is comfortable by dipping an applicator into wax and applying a small amount to the inside of the wrist. If wax runs off applicator, it's too hot – wax should cling to the applicator. 3. To begin waxing, cleanse skin. Next, apply an even layer of hard wax in the opposite direction of hair growth, and then back down to encapsulate the hair. For a better grip to remove wax, leave a thicker edge of wax when applying it. 4. Allow wax to cool on skin until wax hardens. Then raise the thicker edge at the end of the strip and remove quickly, pulling against the direction of hair growth. 5. After hair removal, apply a post wax lotion.

Vanilla Wax Pebbles 1000g

Ideal for even the most difficult skins, it incorporates all the delicacy of vanilla, with its distinctive soft, comforting fragrance. A particularly soft, elastic wax, it is ideal for those who regularly perform whole-body hair removal or need minor corrections in specific zones.
