

HOT WAX DISC DESCRIPTION & USE INSTRUCTIONS:

This is a Starter Wax kit. Ideal for travelling, mobile therapists, start-up salons and especially suitable for the home user.

- 1. Thermostatically controlled, this nifty heater ensures that the wax is always heated to the perfect temperature thereby avoiding burns or bruises (usually caused by the wax being too hot or too cold).*
- 2. The kit also includes a kg of Italian Hot Wax by Xanitalia, a trusted brand in depilatory products.*
- 3. Also included is a pack of 50 disposable wooden spatulas for applying the wax.*

Directions:

1. Place wax discs into a wax warmer. Turn warmer on and heat wax for approximately 20 minutes. Do not melt wax completely; wax should be a thick consistency in the center and soft around the sides.

2. Before hair removal, check if the wax temperature is comfortable by dipping an applicator into wax and applying a small amount to the inside of the wrist. If wax runs off applicator, it's too hot – wax should cling to the applicator.

3. To begin waxing, cleanse skin. Next, apply an even layer of hard wax in the direction of hair growth. For a better grip to remove wax, leave a thicker edge of wax when applying it.

4. Allow wax to cool on skin until wax hardens. Then raise the thicker edge at the end of the strip and remove quickly, pulling against the direction of hair growth. 5. After hair removal, apply a post wax lotion.

Advantages of Xanitalia Hot Wax:

- Lower melting temperature 104°F - 115°.
- Ideal for hair removal on delicate areas (armpits, bikini, face).
- Longer cooling time, which provides longer thermal exposure, relaxes hair follicles and makes waxing less painful.
- Completely adjustable to the skin surface, catching all the hairs without applications repeating.
- Because of it's extra elasticity Xanitalia wax won't break during hair removal.
- Significantly reduces the time required for depilation procedure.

WEIGHT: 1850g
